Work Experience

Backend Developer at Rikkeisoft

May, 2022 - Present

👉 E-commerce Website

Description: Maintain and upgrade an e-commerce website based on EC-Orange core version 2.x for clothing sales as per customer requirements. Tasks include product customization, calculating estimated shipping dates, integrating payment methods like SBPS and .com, upgrading system components (PHP version, AWS, Postfix, etc.), migrating the operating system from CentOS to Red Hat, and enhancing authentication processes.

Role: Team Leader

Framework: PHP / Laravel / Node.js / MySQL / GraphQL / AWS

👉 E-Commerce Website

Description: Developed a new e-commerce website using EC-Orange core version 4.x, tailored for selling clothing to students in a school. The platform allows shops to register and upload products, enabling students to browse and purchase clothing items directly on the website.

Role: Team Leader

Framework: PHP / Laravel / Vue.js / MySQL / AWS

Fullstack Developer at Fabbi JSC

Mar, 2020

👉 Maintain and Upgrade Law Book Rental System

Description: Responsible for maintaining and upgrading an online law book reading and rental system. Key features include uploading books, renting books, online reading with support for bookmarking pages and highlighting important lines. Also optimized performance for faster book loading and improved reading experience, enhanced security to protect copyrighted content, and improved UI/UX for a smoother rental and reading process.

Role: Developer

Framework: PHP / Laravel / MySQL / Vue.js

👉 Learning Management System

Description: Responsible for developing and maintaining a learning management system. Features include managing classes and courses, watching video lectures, taking tests, chatting with instructors, participating in scheduled exams, and tracking study results with monthly and yearly statistics.

Role: Developer

Framework: Flutter / Node.js / Firebase / Google Cloud

👉 Dating App

Description: Developed an online dating and matching app with various features including location-based matching, chat, video calls (using Agora), top-up, account upgrades, donations via in-app purchases, withdrawal, and explicit content detection through Google Cloud Vision. The app offers a seamless and secure user experience for online dating.

Role: Developer

Framework: PHP / Laravel / MySQL / React Native / AWS

👉 E-Commerce

Description: Developed an e-commerce website for clothing. In addition to purchasing on the website, products are synchronized and uploaded to various e-commerce platforms such as Yahoo, Wowma, Rakuten, and Amazon, enabling wider product visibility and sales.

Role: Developer

Framework: PHP / Laravel / MySQL

👉 Learning Management System

Description: The application enables users to schedule and plan their study through video lectures. Each video includes multiple exercises for practice, with MathJax integration for displaying charts and mathematical formulas. It records results and analyzes learning progress by month and year. Additionally, the app features a chat room where students can discuss, exchange ideas, and directly ask questions to instructors.

Role: Team Leader

Framework: PHP / Laravel / MySQL / React Native / AWS

Backend Developer at Sun* Inc Viet Nam

Sep 2019 - Mar 2020

Education

Bachelor of Science in Information Technology from Hanoi University of Business and Technology

2016 - 2020
